A Special Message from our Founder/CEO and our Chief Operating Officer:

We want to personally thank you for considering Seniorcorp services for your family. We understand you have choices, and we’re privileged that you’ve invited us into your home to learn more about Seniorcorp.

Seniorcorp was started in 2003 after struggling to find adequate care for my grandparents. My goal was to address a need in the community for compassionate, quality, in-home care services for the aging population. Dedicated to “Changing the Way America Ages”, Seniorcorp offers seniors the ability to live in a familiar home environment and remain independent for as long as possible.

We’re pleased to say that Seniorcorp’s exceptional caregivers have helped us serve thousands of families right here in Hampton Roads. From the information in your packet, you will see we offer programs ranging from 2-hour “express visits” to 24x7 live-in care to fit your particular needs and lifestyle.

So whatever your level of care is today, or in the future, we invite you to trust Seniorcorp to take excellent care of you. We have over 300 dedicated employees and we are committed to being accountable and aware of your needs in order to provide the level of service you deserve and want. You will be assigned a personal scheduler who will come out and meet you and is available to talk with when needed. However, if you feel the need to speak with the leadership about anything, good or bad, we are here for you. Our personal cell phone numbers are listed below.

Again, thank you for considering Seniorcorp to provide you with care, and we look forward to serving your family’s needs in the near future. I can’t wait for you to experience first hand just how Seniorcorp is making a positive difference in the lives of local seniors everyday.

Sincerely,

Tom Knox

When is the right time to consider Home Care?

IS HOME CARE RIGHT FOR YOU?
- Driving and completing errands is challenging
- An illness hinders your ability to complete personal care and hygiene activities
- Dealing with dementia and Alzheimer’s
- Light housekeeping chores are difficult
- You are concerned about falls
- You would enjoy companionship
- Managing medications is difficult
- 24-hour support is needed

A recent AARP survey found that nearly 90% of people over age 65 want to stay in their home for as long as possible, and 80% believe their current residence is where they will always live. As you age, there are steps you can take to ensure that you preserve an independent and dignified lifestyle while in the comfort of your own home.

Several care planning strategies include making small home modifications, completing certain legal documents, and planning for the home and community based services that best fit your needs.

The life-enriching services that Seniorcorp provides help seniors throughout the community preserve an independent and dignified lifestyle while in the comfort of their own homes.

How can a home care agency help?

Having a trained caregiver in the home is an excellent way to give the entire family extra piece-of-mind. Caregivers can help prevent falls, remove the risk of driving and provide an extra layer of safety in the home. Most importantly, an in-home care agency can ensure cognitive stimulation, social engagement outside the home and an independent and active lifestyle.
